DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or render obvious an apparatus for sensing neutron flow having all exclusive limitations as recited in claims 1 and 10, comprising a first planar array of flash memory cells and a second planar array of memory cells, the second array of memory cells being formed at an angle relative to the first array of flash memory cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Copies of the references are not being furnished with this Office Action per MPEP § 707.05(a).

- a) U.S. Patent 5,319,210 to Moscovitch discloses a neutron dosimeter comprising a 3-D optical memory and a wearable holder.

b) U.S. Patent 6,765,978 to Kronenberg et al. discloses a neutron spectrometer formed by a series of substrates covered by a solid-state detector stacked on an absorbing layer.
